

Aluminum Patio Doors

Sleek lines, timeless durability.
Maximum view, modern flair.

- [Standard Aluminum Patio Doors¹](#) Make the most of your home's views with the sleek, trim sight lines of our durable aluminum patio doors. [Learn More >](#)
- [Thermally Improved Sliding Doors²](#) Milgard Thermally Improved Aluminum patio doors feature enhanced thermal ratings for higher energy efficiency. [Learn More >](#)

Architects and builders have long appreciated aluminum patio doors for their overall strength, lasting value and ability to configure into large combinations to maximize views. We continually redesign, improve and update our rollers, locks, frame members and hardware. That's why our aluminum patio doors rate high in appearance, strength and value. All Milgard aluminum patio doors include our exclusive SunCoat® Low-E glass, two grid styles and several finish options for complementing your home.

Available in standard aluminum for mild climates or thermally improved for extreme weather conditions, Milgard aluminum patio doors bring a decidedly modern edge to entrances into any home or building.
