

# Fiberglass Patio Doors

**The ultimate choice.**  
The door material that could teach wood a thing or two.

- Ultra™ Series Fiberglass Patio Doors A traditional French door look with the superior durability, strength and weather resistance of fiberglass.
- WoodClad™ Series Fiberglass Patio Doors Enjoy a carefree fiberglass exterior with the beauty of a furniture-grade natural wood interior.

The complex frame components required for patio French doors were once impossible to attain with fiberglass. Milgard's research and development team changed all that. We engineer fiberglass French doors (in-swing and out-swing) and French-style sliding patio door systems that are as attractive as they are weatherproof and durable. It's a difference you'll appreciate for a lifetime.

Milgard fiberglass patio French doors are designed to match the beauty and profile of wood patio doors, but with none of their maintenance headaches. Milgard fiberglass patio doors ward off wind, snow and rain, year after year, without peeling, swelling, expanding, contracting, cracking or warping. They're impervious to cold, heat, insects, salt air and corrosion. Available in custom sizes and multiple panel configurations, Milgard fiberglass patio doors include our industry-leading Full Lifetime Warranty with Glass Breakage
